<http://www.ushistory.org/us/51e.asp>

- What event or events took place that inspired this particular article to be created?

::Anyone who was japanese and living in america were relocated into internment camps

- What specific things in history have violated this article to inspire it's creation? (needs to include ideas prior to WW2) picked out a specific ethnicity and invaded their homes. Evacuated the japanese into internment camps.

Modern

<http://www.usnews.com/opinion/articles/2014/05/13/should-eu-google-users-have-privacy-rights-to-remove-search-links>

- What is going on in the world, specifically today, that violates this human rights?

::People's personal information are on the internet searches and its violating the right to privacy.

- You should include specific events/ occurrences that have happened within the last five to fifteen years.

::Google's searches have people's personal information accurate or inaccurate its still personal information

The union wants google to let people to be "forgotten" from the internet searches

<http://www.washingtontimes.com/news/2014/apr/1/us-confirms-warrantless-searches-of-americans/>

<http://theamericanscholar.org/the-invasion-of-privacy/#.U3w7FlhdWfw>

- What is going on in the world, specifically today, that violates this human rights?

Warrantless searches are a big problem in the US. Obama admits that surveillance operations are being conducted on innocent Americans, to “try” and prevent terrorist attacks. However, we do not know who is actually doing the surveillance operations. I guarantee that some things that are private are being leaked because of these “operations”. I think there is a better way to solve this problem, because having private messages and phone calls read and listened to gives a very bad feeling. Obama even admits that the operations are a bit much and would like to hold back. The US has even gained permission for surveillance of people located in different countries, however I feel like this is a violation of privacy under the United Nations because there is invalid permission being granted for people to search your personal life.

- You should include specific events/ occurrences that have happened within the last five to fifteen years.

TMZ is a big example of leaking content. I think that the only way that insane images, videos and content are being leaked is the “surveillance” is taking the media and trying to sell this to tabloids to make extra money.

Future

<http://www.lifelock.com/how-it-works/>

- What organizations help to change or bring awareness to your issues/ article?

Lifelock understands that identity theft is becoming more and more popular. Therefore, they are selling a service to protect identity.

- What specific actions can we take to insure that this article is no longer violated.

I think it is key that we all become aware of identity theft, and try to prevent it from spreading.

- Do you feel as if this issue will continue to exist despite efforts to eradicate it? (explain in detail)

I honestly think that the situation will get worse because of all the people who have the knowledge and ability to take an identity away from them.

<http://www.usa.gov/topics/family/privacy-protection/tips.shtml>

- What organizations help to change or bring awareness to your issues/ article?

The US government is trying to keep private information safe.

- What specific actions can we take to insure that this article is no longer violated.

I think that the US government should stop trying to stalk ordinary people.

- Do you feel as if this issue will continue to exist despite efforts to eradicate it? (explain in detail)

I think it won't, because for the safety of our country, it is important to screen everybody for suspicious activities.
